EDUCATION

Bachelor of Technology

SRM Institute of Science and Technology, Ramapuram

08/2023 - 05/2027

CGPA
9.27 / 10

SKILLS

C/C++ | Python | Java | MySQL | PostgreSQL | HTML | CSS | JavaScript | React

Machine Learning | Deep Learning | Web Development | Flask | TensorFlow | Keras

POSITION OF RESPONSIBILITIES

Technical Member

GeeksforGeeks Student Chapter

2024 - Present Chennai, India

- Engaged in intensive practice of Data Structures and Algorithms and participated in more than 30 coding competitions, leading to a significant improvement in problem-solving speed and debugging skills on platforms such as LeetCode, GFG and CodeChef

Content Creator Lead

Foriegn Language Club

2023 - Present Chennai, India

- Created German-language instructional and promotional content while organizing five or more cultural events and seminars, increasing student engagement, expanding social media outreach, and boosting active club membership by 30%.

PROJECTS

Sign Language Interpreter

07/2024 - 11/2024

https://github.com/YaminiShankari/Sign-language-interpreter

- Developed a real-time sign language recognition system using a 3-layer CNN (TensorFlow, Keras), achieving 85% accuracy across four gestures.
- Built and annotated a custom dataset of 279 images and applied OpenCV preprocessing to enhance model performance.
- Optimized model architecture and parameters to enable reliable real-time inference for assistive communication use cases.

Rubik's Cube Solver

04/2025 - 07/2025

https://github.com/YaminiShankari/Rubik-s-cube-solver

- Designed an SVM-based color classification system (RBF kernel) with a hybrid HSV + LAB feature set, achieving 96.09% test accuracy.
- Performed data augmentation and hyperparameter tuning (GridSearchCV) to improve robustness under varying lighting conditions.
- Built an interactive React dashboard for real-time visualization, structuring the system as a preprocessing module for cube-solving pipelines.

Lung Nodule Malignancy Prediction from Low-Dose Chest CT

Present

- Using pre-trained ResNet-18 (feature extraction) to generate deep representations from CT scans.
- Applying Logistic Regression for binary classification, creating an efficient hybrid ML–DL model.
